Hello Sir,

Here is our feedback:

1. Response against enquiry: Response was immediate. The technology was very well explained and the capability of the machine on offer was also explained very well. This helped us understand the true capability of this machine and technology.
2. Clarity of requirement: Our requirement was clearly understood. Apart from the original enquiry multiple other parts were identified and milling solution was offered. We truly appreciate this.
3. Delivery: Was as expected and on time.
4. Transportation: No issues related to transportation and packing. We appreciate the effort of reusing/recycling the wooden pallet.
5. After sales support: Excellent after sales support. Application engineers who visited our facility were very knowledgeable and have the right attitude.

We look forward to continue and grow our business relationship.

Thanks,

For A.G. INDUSTRIES
