Trishull Machine

Dear Shiva,

Re the Trishull Machine it is fantastic we cannot imagine life without it.

We are trying some chip braking tools on it just because we like to experiment

So as you know with tooling it is on going, but Mike the gentleman you met briefly is back from a long illness and his task is to put the Trishull through its paces and report back to me with any improvement.

The improvements however if any will only be on the tooling I cant see at present that we could improve upon the machine.

I will keep you informed with any information

Best Regards  
Neil
