9th October 2018

FAO C.S.ShivaShankaraiah,

P L H Engineering LTD purchased a Polygon Turning Machine TPT-2s in February 2018 from Trishul Machine Tools PVT. LTD. From the initial contact regarding the query about the machine, everything was done to high professionalism. The information pack we received within a week, along with a DVD to show exactly what the machine is capable of, was very informative and allowed us to make a decision.

The communication between C.S.ShivaShankaraiah and ourselves was with ease, and everything was completed within a couple of weeks. Trishul Machine Tools PVT. LTD kept our Company up to date with the progress of the machine during the manufacturing process.

The machine was despatched by the agreed despatch date and was packed to all details given. When the machine arrived in the UK, and arrived to our unit, the packaging was still as intact as when it left the factory, and all items detailed on the packing list was present.

The professionalism continued when C.S.ShivaShankaraiah visited the UK to commission the machine; everything was explained, and shown as detailed, and the machine has been used to a high level at present, without any problems.

I would recommend anyone who wishes to buy a Polygon Turning Machine to Trishul Machine Tools PVT. LTD; and P L H Engineering will be looking at purchasing another one in the coming quarters.

Thank you, Trishul Machine Tools, PVT. LTD!

Laura Henshall
